<p><b>4891</b></p> <p><b>Granta Multi System Manager</b></p> <p>Granta Multi System Manager provides a centralised database for easy IT support, centralised services including monitoring and reporting, as well as management for alarms, users and visitors. Granta MSM connects as a central control workstation to each of the client systems simultaneously, which minimises workload across the whole system.</p> <p>Granta MSM can connect and manage up to 32 client Granta systems. It is very easy to upload each site's complete database to the fully partitioned central SQL database in Granta MSM. Each of the client systems operates completely independently of each other, which provides administrators with all the independence and regional security that was previously ensured by having their own local database.</p> <p>Transactions from all the client systems can be monitored in Granta MSM as a group or on individual on-screen monitors. It is also possible to monitor, acknowledge and clear alarms from all client systems in Granta MSM, with the same functionality as at the client system. Regardless of where these actions are performed, they are visible both in Granta MSM and in the individual client system. Similar functionality is also available for Card Image Monitor and Alarm Graphics on the MSM station.</p> <p>The user management functionality in Granta MSM provides full visibility and creates a common, centralised card population of up to 100,000 cardholders. Granta MSM can be used to administer users' access levels and validation for any of the client systems. The functionality in Granta MSM is extended beyond what it is at the client systems in that Granta MSM can display and administer a user's data for all client systems at the same time.</p> <p>Granta MSM includes reporting functionality that includes a suite of comprehensive global and local reports for all of the client systems.</p>	<b>GBI: 50-571</b>
