Answers for infrastructure.

**SPCAnywhere for iOS - The iPhone® and iPad® application that gives you control over your intruder detection devices wherever you are.**

The SPC series is a new generation of security systems that combines sophisticated intruder detection and access control with cost-effective, future-proof technology.

SPCAnywhere is a mobile application for iOS that supports the iPhone and iPad. The attractive, ergonomic and easy to use application provides remote users with a powerful interface to control their SPC intruder systems wherever they are, from anywhere, at anytime.

As a password-protected user, SPCAnywhere will allow you to securely view and control your SPC intruder system at whichever of your premises it is installed. You can set or unset your SPC intruder system, open doors, check the status of all of the zones (detectors) within your system. Importantly, you can also to get a live view into your supervised premises by accessing the IP cameras that are connected to your SPC system.

**SPCAnywhere at a glance**

**Multi-Site**

Manage several sites from any remote location with ease and switch between locations at will.

**View and control**

Monitor the status of your premises, set or unset detectors and cameras, control detection zones by room and by individual premises.

**Door control**

Remotely set all doors controlled by SPC to permit or restrict access.

**Graphical map**

A graphical map allows you to position the detectors freely on a map of the site, visualise the installation with direct control and status reports.

**Live Camera viewing**

All images through SPC connected IP cameras can be remotely viewed in SPCAnywhere.

**Specifications**

Requirements	Device: iPhone4, iPhone4S iPad Operating system: iOS4 or later
Maximum sites	4 (plus one demo site)
Refresh	On request
Screen view	-Site select view -Area overview -Zone view -Door -Camera view -Log file view: intrusion log, access log -Wireless Personal Alarm Log
Availability	For download  QR Code
