

# Nextiva Mobile Video Surveillance App

Nextiva® Mobile™ helps turn smart phones and tablets into a mobile video surveillance and response tool. Security personnel need access to information both in the office and on the move. With the Nextiva Mobile app, users can view live and recorded video from any camera within their network and respond immediately to any situation.

## Security and Control in the Palm of Your Hand

Nextiva Mobile allows Nextiva Video Management Software users the ability to view video from any location on the network, and from anywhere in the world—right in the palm of a hand. Using WiFi, 4G and 3G networks, Nextiva Mobile ensures that while security personnel are on the move, they always have access to the camera video on site. Whether personnel is on-duty or off-duty, on premise or off premise, indoors or outdoors, Nextiva Mobile ensures they are just a tap away from knowing what is going on within the Nextiva security site.

The Nextiva Mobile is an enterprise-class application featuring the following:

- Secure login and authentication
- Live or playback video viewing from one or more cameras and camera tours
- Camera selection using pre-defined filters and favorites
- Easy camera navigation using finger swiping
- Digital zooming

Nextiva Mobile includes the smart phone or tablet client application and the Nextiva Video Management Software video streaming service. Nextiva Mobile will be available for download at the Apple App Store in Q4 2012.

\* Future version releases may include similar or enhanced features or functionality. There may be an upcharge for any new feature or functionality.
