

# 2.4 GHz

The innovative MSC-244c sends video from locations normally not possible, convenient or economical with the industries smallest 2.4GHz wireless four-channel user selectable, color pinhole camera system. "Plug & Play" out of the box, the system includes a wireless receiver, AA battery pack holder, universal mounting bracket and power supplies. One 9 Volt battery lasts 6 – 8 hours, making it ideal for portable, temporary and covert surveillance or monitoring applications.

## Advantages

- Easy to use – "Plug & Play"
- Four user selectable channels
- Incredibly sharp high resolution color picture
- Perfect for office, warehouse or nursery
- Ideal for portable, temporary and covert surveillance or monitoring applications
- Extremely low current consumption
- One Year Limited Warranty

**MSC-244C KIT**

SPECIFICATION	MSC-244C
Radiated Power	50 mV/m @ 3m
Operating Distance Line of Sight	<b>Up to 1,000 feet</b>
Operating Distance Indoors	Up to 300 feet
<b>Four User Selectable Channels</b>	2.4108 – 2.4728 Ghz
Antenna Type	Fixed Omnidirectional
Video Format	NTSC or (PAL – special order)
Color CMOS Camera	3.7mm pinhole Auto Iris 2 Lux
Resolution	380 Lines (H) x 350 Lines (V)
Temperature Range	-22° F to 140° F
Power Supply Included	7 to 14 Volts DC – Polarity Protected
Current Consumption	60 mA
Dimensions	1.37" x 2.1" x 0.65"
FCC / Industry Canada Approved	YES
