

COLOUR TV VIDEO KITS

The TV kits are available with either a Videx audio handset or the Art280N1 telephone interface to allow the users standard telephone to be used. Both kits allow the door panels colour picture to be viewed on a domestic TV. The door panels are available in stainless steel, aluminium, white, brown or bronze.

Operation *Note: A spare Scart socket on the TV is required for the kit to function correctly*

VK6S/TV [4J/TV] & VK6/TV [3J/TV]

- Surface or flush door panel c/w colour camera, high quality speech amplifier and call button with illuminated name plate.
- 24V ac 1A transformer
- Audio handset c/w lock release button and camera recall button constructed from white ABS plastic.
- Scart interface box and plug (3m cable)

On receiving a call from the door panel, the telephone will ring and the TV will automatically switch to the AV channel to show a colour picture of the caller (The TV must be on). On answering the telephone a conversation can take place with the caller at which point the door can be released. On ending the call, the TV will switch back to the previous channel.
