

Vigilant NetView

IP Control Center and Management Solution

Protecting your core business interests is our specialty. Vigilant NetView IP Control Center is a fully digital video management solution that provides a virtual matrix, powerful event handling and site mapping capabilities. It is a state-of-the-art replacement for legacy analogue matrices providing multiple monitor capability via any PC on a network with a traditional CCTV keyboard joystick.

An end-to end software-based application, Vigilant NetView provides more accuracy, flexibility and focus. Security personnel gain improved decision-making abilities, resulting in higher efficiency, with significantly less margin for human error. This has been specifically designed to provide more security for large-scale installations in mission-critical, multi-user environments.

At once flexible, robust and reliable, Vigilant NetView provides multiple monitor superior capabilities and may be positioned anywhere in the network.

Vigilant NetView is fully compatible with Vigilant's ViewStation™ administrator & query station, NetStream™ IP video servers, SmartGuard™ content analysis solutions as well as all Vigilant DVR solutions.

Vigilant NetView Highlights

- > End-to-end, fully-digital security and surveillance system
- > Instant access to live and recorded video from any camera on any monitor
- > Connect and control multiple monitors over the network
- > Displays 1, 4, 9 and 16 split video screens over multiple monitors
