

Application Software

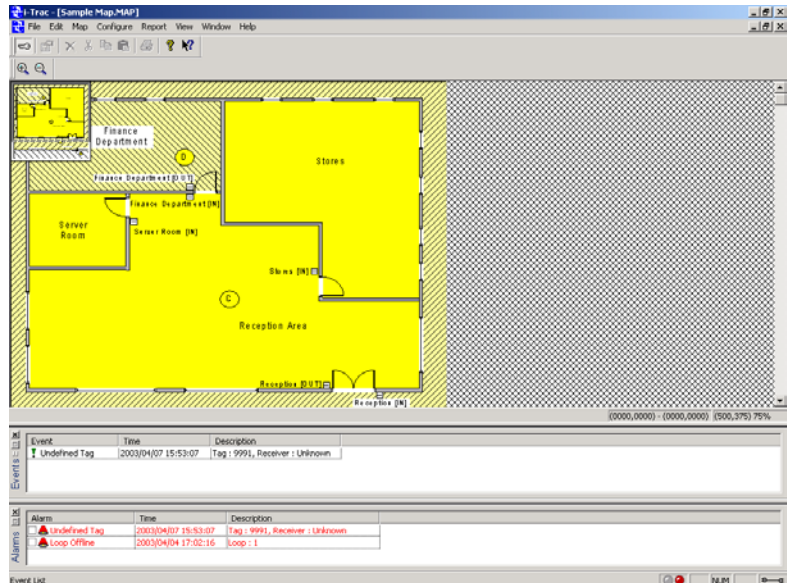

Product Code: SW-300

Description: i-Trac version 1.5

i-Trac is a client server application used for the real-time monitoring of Assets and Employees with the use of RFID technology.

Features

- Protocol support for Wavetrend L-RX200, L-RX100 and legacy EMS Hardware
- Online help file
- Resizable System Event and Alarm Windows
- Interactive maps show approximate location of assets and employees at real-time
- Tag 'buddying' – Asset tag linked to Employee tag – A violation will occur if both are not detected at a predefined reader such as the entrance of a facility.
- Readers grouped into zones (physical areas) used to authorise Assets and Employees
- Alarms can be raised by unauthorised actions and can be filtered from certain workstations
- Alarm based scripting
- Digital outputs activated by alarm conditions
- Scripting language supports both Microsoft® COM and the external function calls
- Support for both Microsoft® SQL Server™ and Microsoft® Access Databases via ODBC

Software Requirements

Microsoft® Windows® platforms supported:

- Microsoft® Windows® 98
- Microsoft® Windows NT®
- Microsoft® Windows® 2000
- Microsoft® Windows® XP
