

WebWay Secure 960/920 Stand Alone

Secure communications

The WebWay Secure 960 and 920 are compact versions of the WebWay Secure 980 Wall mount communications panel. Both help to improve the safety of your property and premises by guaranteeing the reliability of security communications. Through the use of ISDN technology, WebWayOne has developed these sophisticated communications products to alert a remote Alarm Receiving Centre (ARC) when intruder-entry and fire/smoke sensors are triggered. These sensors can include video cameras and audio devices, giving you the potential to monitor and record every aspect of the security breach.

Both the WebWay Secure 960 and 920 have the option for adding a GSM module, providing back-up for alarm information in the event of an ISDN line Break. This also provides the verification necessary to satisfy the requirements of the Association of Chief Police Officers, ACPO 2000

Monitoring the status of your security system is important. Both the WebWay Secure 960 and 920 can be programmed to operate with RedCARE ISDN and RedCARE GSM.

The 960 includes two telephone ports and a data port as standard giving the opportunity to route all voice/telephony and data applications through the unit. The 920 is a data only version and is ideal for use with Digital Alarm panels and Video Surveillance systems. Both units can be enhanced by the introduction of a second data port.

The WebWay Secure 960 and 920 both offer a reliable means of connecting your security devices with a remote Alarm Receiving Centre. Modules are available to give a product that is

- High capacity - transmits data from a wide variety of sensors including video and audio
- Versatile - permits addition of telephone, modem, and internet systems with call prioritisation
- Low cost - Uses a Basic Rate ISDN telephone circuit
- Verifiable - Enabled for RedCARE ISDN and RedCARE GSM
- Compatible - works in conjunction with all major alarm panels

The WebWay Secure 960 can be upgraded and adapted to meet specific customer requirements. Please call WebWayOne to discuss an individual application

WebWay Secure 960/920 Stand Alone

Specification:

Features

High speed ISDN access

Remote configuration

Password protection

Emergency call override

Low cost routing

Dual data ports

World-wide ISDN support

GSM data and SMS access

GSM voice (960 only)

Dual telephone ports (960 only)

PABX functions (960 only)

Dual data ports

RS232, X21

Protocols V120, V110, PPP and MLPPP

MSN, CLI and sub address support

Optional X25 PAD, B or D Channels

Optional Sync X25 B channel

Two analogue ports (960)

Digital communicator

Telephone handset

Headset

Modem/DTMF

PABX functionality

Low cost routing

GSM module (optional)

Data backup

Voice backup

Modem/DTMF backup

Other features

Priority for alarm calls

Call barring

Caller line identity

Remote configuration

Priority for 999 calls (960 only)

Power Supply

External plug top 230 Volts

Up to 24 Volts DC

Option board for 48 Volts DC (Data only)

Compatibility

ISDN 2e, ISDN 2 and BT Highway

Approvals

CE marked under European terminal directive

Dimensions

Height 45mm Width 220mm Depth 150mm

Ordering information

WebWay Secure 960 Stand Alone
