

Apollo Security appoints security expert Reuben Rebullar as Director of Engineering

Published on 31 Jul 2018

Apollo Security, a premier provider of access control and alarm monitoring solutions for over 30 years announces the appointment of Reuben Rebullar as Director of Engineering. Mr. Rebullar will be responsible for ongoing development and expansion of Apollo's robust open hardware platform and feature rich software platform.

Integrated security systems expert

Mr. Rebullar joins Apollo with 12 years of experience in the hardware and software industry, most recently serving as Engineering Manager at Mercury Security in Long Beach, CA. He will oversee the development of Apollo's fast-growing ASP Series Network Clustering Integrated Controllers as

well as APACS software platform. While known primarily for integrated security systems, Apollo has been providing OEM hardware solutions for the entire life of the company and recently established ApolloEM as a division dedicated to sales and support for software developers and advanced system integrators.

“We are delighted to welcome Reuben to the Apollo family and look forward to the new exciting innovations he and his team will deploy for our customers,” commented Clifford Crane, Managing Director of Apollo.
