

## Geutebrück opens new offices in Malaysia and India to better support logistics and government sector customers

*Published on 18 Apr 2019*

# GEUTEBRÜCK

Geutebrück, international specialists for video systems in the security and process optimisation sectors in Germany, will be represented with offices in India and Malaysia from May onwards. From these locations, customers from the logistics, industry and government sectors will be supported more closely.

Geutebrück Southeast Asia is focussed on the regions bordering Malaysia, Singapore, Indonesia, Thailand, Vietnam and Hong Kong. The office premises in the Malaysian capital Kuala Lumpur are a sales, representation, showroom and training centre in one.

## Individual response to each project

Our customers in Southeast Asia appreciate the flexibility of being able to respond individually to each project"

Geutebrück Gemini India Solutions Limited is the name of the joint venture between Geutebrück and Gemini Software Solutions. Gemini is a subsidiary of the Kanoo Group of Companies, Bahrain, and provides software solutions worldwide. Geutebrück Gemini India Solutions Limited is based at World Techno Park in Trivandrum, and in New Delhi, India.

*"Our customers in Southeast Asia appreciate the flexibility of being able to respond individually to each project, rather than offering ready-made solutions. And they rightly expect us to be personally at their side with support and service,"* explains Managing Director Katharina Geutebrück, who is the second generation to run the family business with her husband Christoph Hoffmann.

## Showcasing versatile video solutions

There is also a change of location in Germany. The software developer's capital city branch relocates to Berlin-Adlershof and showcases its versatile video solutions in a state-of-the-art showroom. *"All over the world, our solutions for securing ministries, institutions or museums and for optimising processes are almost invisible. In our capital city office, we show what makes us a successful global player,"* adds Christoph Hoffmann.

The innovative development of software products, also in the field of artificial intelligence, and successful international projects have made Geutebrück a respected expert and world market leader for video solutions 'Made in Germany'. Company headquarters, manufacturing plant and R&D centre are in Windhagen, directly located between Cologne and Frankfurt.
